

Cd

Cadmium

Cadmium is a soft, silvery-white metal is chemically similar to the two other stable metals in group 12, zinc and mercury. Cadmium is a minor metallic element, one of the naturally occurring components in the earth's crust and waters, and present everywhere in our environment. Most cadmium metal today is produced as a by-product of the extraction, smelting and refining of the nonferrous metals – zinc, lead and copper.

Some of Cadmium metal's applications are found in industries like

Product Specification

Cadmium Specification	
Cd	99.99% Min
Cu	0.001% Min
Pb	0.001% Min
Zn	0.001% Min
Fe	0.001% Min
