

FeMo

Ferro Molybdenum

The Ferro molybdenum comes from the aluminothermic reduction of technical graded molybdic oxide and ferrosilicon. The alloy is classified based on molybdenum content. It finds application in the production of stainless steel and other special types of steel for appliances that need to withstand high temperatures.

Some of Ferro Molybdenum alloy's applications are found in industries like

Product Specifications

Ferro Molybdenum	Option 1	Option 2
Molybdenum (Mo)	58-60%	65% Min
Sulphur (S)	0.1% Max	0.1% Max
Silicon (Si)	1.5% Max	2% Max
Phosphorous (P)	0.05% Max	0.05% Max
Carbon (C)	0.1% Max	0.1% Max
Copper (Cu)	0.5% Max	0.5% Max
Size	10-50mm	10-50mm
